EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

On page 1, line 5, insert the phrase "now U.S. Pat. 6,645,354" after "2002" in order to update the status of this recited application.

The following is an examiner's statement of reasons for allowance:

Claims 1-10 are allowable over the prior art of record because the prior art of record does not teach the claimed vacuum arc coating apparatus as claimed including the first steering conductor being electrically independent of the second steering conductor, wherein by varying a level of current applied through the first steering conductor relative to the second steering conductor the arc spot shifts toward a long side of the at least one cathode plate.

Claims 11-20 are allowable over the prior art of record because the prior art of record does not teach a vacuum arc coating apparatus as claimed including a magnetic steering system comprising at least first and second steering conductors respectively arranged behind the evaporation surface along the short sides of the at least one cathode plate, the first steering conductor carrying a current in a direction opposite to a direction of current in the second steering conductor, the first and second steering conductors being electrically independent and being disposed in the vicinity of the

evaporation surface so that a magnetic field generated thereby exerts a magnetic influence on the arc spot, wherein the magnetic fields generated by the steering conductors are oriented in the same direction in front of the evaporation surface such that a level of current through the first and second steering conductors can be varied independently to thereby direct arc spots in a desired direction around the evaporation surface.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
